Guillermo Fernando Farfán Romero

Senior Cloud Architect & DevOps Engineer

Buenos Aires / Salta, Argentina (Immediate Relocation to CABA · Hybrid Scheme) | +54 9 11 2187-1473 | fernando.farfan16@gmail.com

Portfolio: gfarfan.dev | LinkedIn | GitHub | Credly

PROFESSIONAL SUMMARY

Senior Cloud Architect and DevOps Engineer with 8+ years of experience spearheading the design, automation, resilience, and financial optimization (FinOps) of mission-critical infrastructure across hybrid and cloud-native environments: **Google Cloud Platform (GCP)**, enterprise virtualization (**Microsoft Hyper-V 2025, VMware, Proxmox**), **Kubernetes (GKE Autopilot/Standard)**, and **Terraform / Terragrunt**.

Specialist in complex migrations (lift-and-shift via M4CE, Veeam Backup & Replication), enterprise workload modernization (SAP on SLES 15), Windows Server / Active Directory / WSUS administration, GitOps pipelines (**ArgoCD, GitHub Actions, GitLab CI**), full-stack observability (**IBM Instana APM, Zabbix, OpenTelemetry**), and DevSecOps aligned with DORA metrics. Combines technical systems architecture with strategic team leadership, backed by a background in Information Systems and Labor Relations (UBA).

TECHNICAL SKILLS & COMPETENCIES

- **Cloud Providers:** Google Cloud Platform (Core Specialist: Compute Engine, GKE Autopilot/Standard, Google Cloud VMware Engine - GCVE, Cloud Run, Cloud Storage, VPC Peering, Cloud Load Balancing, Cloud Armor WAF, Zero-Trust IAM, Cloud Interconnect, Filestore, Secret Manager), AWS (EC2, EKS, S3, VPC, IAM, CloudWatch), Microsoft Azure.
- **IaC & Automation:** Terraform (Reusable Modules, Remote Backends, GCS State Locking), Terragrunt, Python (Infrastructure Automation, APIs & Scripting), ArgoCD, Helm Charts, Kustomize, Ansible, TFLint, Checkov, Infracost, Bash Scripting.
- **Virtualization, Backups & Containers:** Microsoft Hyper-V (Failover Clustering, Live Migration 2025), VMware (vSphere, ESXi, GCVE), Proxmox, Veeam Backup & Replication (VBR), Kubernetes (GKE, kubectl, Ingress, HPA, NetworkPolicies), Docker, Platform Engineering & IDP.
- **CI/CD & DevSecOps:** GitHub Actions, GitLab CI, Google Secret Manager, HashiCorp Vault, Trunk-Based Development, SemVer, Trivy, SonarQube (SAST/DAST), Security Gates in CI/CD.
- **Observability, SRE & FinOps:** IBM Instana APM, Zabbix, OpenTelemetry (OTel), Google Cloud Operations (Monitoring/Logging), Prometheus, Grafana, SLOs/SLIs, DORA Metrics, FinOps Foundation Framework.
- **Systems, Directory & Networking:** Active Directory, WSUS, Windows Server (2019-2025), Linux (SUSE Linux Enterprise Server - SLES 15 SP7 for SAP, Ubuntu, Red Hat), SAN Storage (HPE Alletra/3PAR, MPIO Round Robin, CSV), XFS, LVM, Hybrid Networking, Firewalls, DNS/DHCP (Infoblox NIOS), Cloud NAT, VPN Interconnect.
- **Databases & AI/Data Infrastructure:** Cloud SQL (PostgreSQL, MySQL), Microsoft SQL Server, Redis, BigQuery, MongoDB, AI-oriented Infrastructure foundations (Vertex AI, High-Performance Compute).

PROFESSIONAL EXPERIENCE

Technical Lead & Senior Systems Engineer (Platform / DevOps Focus) | Reforest Latam

May 2026 – Present | Full-time (Remote)

- **Spearheaded cloud financial optimization (FinOps) on Google Cloud Platform** for environmental telemetry platforms, resizing compute instances and configuring elastic autoscaling to achieve a **sustained 28% reduction in monthly cloud infrastructure spend**.
- **Architected and implemented a cloud-native GitOps pipeline on GKE Autopilot and Cloud Run** using GitHub Actions and continuous reconciliation with ArgoCD, **slashing deployment lead times from 5 days to minutes (Zero-Downtime)**.
- **Enforced a Zero-Trust security posture on GCP** through fine-grained least-privilege IAM policies, dedicated Service Accounts, and Cloud Armor WAF rules, mitigating DDoS vectors and unauthorized access.
- **Integrated automated container security scans using Trivy and SonarQube into CI/CD pipelines**, ensuring **100% of production container images are free of critical and high-severity vulnerabilities**.
- **Led and mentored a platform engineering team of 6**, establishing Architecture Decision Records (ADRs), continuous code reviews, and agile Scrum workflows.

Senior Cloud & Infrastructure Architect (Enterprise Consulting) | B2B Corporate Projects

January 2021 – Present | Strategic B2B Technology Consultant (Independent / Contract / Remote / Hybrid)

- **Architected, deployed, and live-certified a Microsoft Hyper-V 2025 HA cluster (Universal Group)** on 3 HPE Synergy blades and HPE Alletra/3PAR SAN storage (55 TB CSV, MPIO Round Robin), integrating **Active Directory**, 20 Gbps Live Migration, and orchestrating migrations and DR with **Veeam Backup & Replication (VBR)**.
- **Led lift-and-shift VM migration and workload modernization to Google Cloud Platform (Grupo Ramos - Phase II)** utilizing **Migrate to Virtual Machines (M4CE)**, provisioning landing zones with **Terraform** (Shared VPC, Zero Public IP), and applying **FinOps** to optimize compute sizing and cloud costs.
- **Led enterprise SAP infrastructure migration to GCP**, automating VM provisioning on SLES 15 SP7 for SAP CAR Rise with Terraform and optimizing XFS/LVM storage layouts for high I/O throughput.
- **Implemented distributed real-time observability and monitoring with IBM Instana APM, Zabbix, and OpenTelemetry** for enterprise clients across Retail, Mining, and Healthcare, achieving a **45% reduction in MTTR (Mean Time to Resolution)**.
- **Standardized multi-environment governance (Dev, QA, Prod)** deploying **GKE Autopilot** clusters (`us-east1`) with NetworkPolicies, and executed disaster recovery plans (DRP) migrating 12 DNS domains and 283 DHCP subnets with Infoblox NIOS.

Senior Software Engineer & Database Administrator | University of Buenos Aires (UBA)

March 2018 – February 2024 | Institutional Systems Specialist (Part-time / Buenos Aires, Argentina)

- **Architected High Availability (HA) replication and automated backup strategies across 8+ TB of mission-critical institutional data** (+50,000 active users), guaranteeing **strict compliance with RPO < 15 min and RTO < 1 hour**.
- **Automated infrastructure operations and maintenance routines with Bash and Python scripts**, achieving a **60% reduction in manual operational workload** across heterogeneous Linux and Windows environments.
- **Performed continuous security hardening and database administration** on high-demand SQL Server and PostgreSQL instances, ensuring transactional integrity and operational uptime.

Systems Infrastructure & Operations Coordinator | Government of the City of Buenos Aires (GCBA)

January 2020 – December 2023 | Full-time (Buenos Aires, Argentina)

- **Guaranteed 99.9% operational database and infrastructure uptime (SLA)** across municipal citizen portals serving 100,000+ monthly users.
- **Achieved zero unplanned downtime** across core public service systems by coordinating scheduled maintenance windows, controlled releases, and proactive monitoring.

EDUCATION

- **Associate Degree in Information Systems** | National Technological University (UTN) *(In Progress — Expected Graduation: December 2027)*
- **Bachelor's Studies in Labor Relations & Human Resources** | University of Buenos Aires (UBA) *(Advanced University Coursework Completed — Focus on Organizational Leadership, Talent Strategy & Engineering Team Dynamics)*

KEY CERTIFICATIONS *(100% VERIFIABLE ON CREDLY)*

- **IBM Professional Certifications (Credly):** IBM DevOps and Software Engineering Professional Certificate | IBM Security for Professionals and DevOps Professionals | IBM Full Stack Software Developer Certificate.
- **Cloud & Accredited Specializations:** Google Cloud Fundamentals: Core Infrastructure (Google Cloud) | IBM IT Scrum Master Specialization | Meta Back-End Developer Certificate.

LANGUAGES

- **Spanish:** Native
- **English:** Professional Working Proficiency (B2 — Fluent technical communication for live engineering syncs, RFCs, technical documentation, and cross-functional collaboration)
